

Strategies

- French language feature films, with the assistance of subtitles (French is preferred), promote a better understanding of the French language and culture.
- French music can be a great resource to assist children in understanding the intonation and pronunciation of French vocabulary or sayings. Students can be exposed to a variety of oral French language models through music.
- Carrying on French conversations with peers, community members, etc.
- Always speaking in French with teachers and French Speaking school staff members, even when carrying on social conversations.
- Travelling to destinations where French is one of the spoken languages encourages your child to use what they've learned in a "real-life" setting.
- Children should be encouraged to participate in student exchanges to enhance their French speaking skills.
- Children should be encouraged to take risks when speaking, reading or writing in French.
- If your child is looking to find a part-time job, encourage your child to apply for positions where their French will be an asset to potential employers.

French Immersion Program

Guidelines

- ✓ Enrollment in French Immersion is a long term commitment.
- ✓ The French immersion program is designed for children whose first language is something other than French. Strong organizational skills, positive work habits and dedicated commitment contribute to the success of any program, regardless of the language of instruction or language spoken at home.
- ✓ A French Immersion student will have the same amount of homework as a student in the English program at the same level, plus homework associated with the French Language Arts program of studies.
- ✓ Maintaining a positive attitude towards the French Immersion program and your commitment to this choice for your child is helpful in promoting their feelings of success.

Home Environment

- ◆ Success in school is strongly influenced by activities in the home and community which stimulate a child's imagination and intellect, enhance self-esteem, teach good work habits and provide motivation to learn and succeed.
- ◆ Creating a safe learning environment at home is important in assisting your child in succeeding.
- ◆ Dedicate a set amount of time each night for homework.
- ◆ Help your child stay organized by using a tool such as an agenda, a planner or a calendar.

Homework Expectations

Homework expectations in grades 10 - 12 are higher than in grades 7- 9. While each teacher has their own homework philosophy, here is a guideline ...

- ✓ Whether in English or French Immersion, a child should be spending approximately 10 minutes per grade level on homework each night (for example, a student in grade 10 should expect to spend 100 minutes per night on homework).
- ✓ Homework may include completing assignments, reviewing daily work or notes, study skills, reading French texts, etc.

** Teachers explain the concepts / directions associated with the assigned tasks in class and students are encouraged to complete their homework on their own. The teacher reviews homework to see what the child comprehends/understands in order to best meet the needs of their students.

** Please check with your school directly to see what lunch hour/after school help is offered for students in French Immersion.
