DECEMBER 2021

In late November, our Mental Health Capacity Building Team joined staff and students at Thorsby Elementary School for a virtual “Cooking up a Story” session. They had so much fun cooking together and listening to stories!

A great afternoon at Leduc Composite High School! Alanna Marklund with UA Canada spoke about what a welding career with the UA entails, and gave the Grade 11 students a chance to try their hands at pipe welding.

At École Beau Meadow School, Mr. Pellatt's class 5P demonstrated their knowledge from what they had learned from the last two units in Science (Electricity and Magnetism, and Mechanisms Using Electricity) to design and construct real working electric vehicles.

And at Willow Park School, Mrs. Milligen's Grade 5 students have been creating their own math problems and creating videos on how to solve them. What a great way for students to demonstrate true understanding of number concepts!

It's beginning to look a lot like
